

## TCR<sup>2</sup> Therapeutics to Present at SVB Leerink Global Healthcare Conference

February 17, 2021

CAMBRIDGE, Mass., Feb. 17, 2021 (GLOBE NEWSWIRE) -- TCR<sup>2</sup> Therapeutics Inc. (Nasdaq: TCRR), a clinical-stage immunotherapy company with a pipeline of novel T cell therapies for patients suffering from cancer, today announced that Ian Somaiya, Chief Financial Officer of TCR<sup>2</sup> Therapeutics, and Alfonso Quintás-Cardama, M.D., Chief Medical Officer of TCR<sup>2</sup> Therapeutics, will participate in a fireside chat at the SVB Leerink 10th Annual Global Healthcare Conference on Wednesday, February 24, 2021 at 8:00am E.T. using a virtual platform.

A live webcast of the presentation will be available on the Investors page of the Company's website at <a href="www.investors.tcr2.com">www.investors.tcr2.com</a>. An archived replay will be available for at least 30 days following the presentation.

## About TCR<sup>2</sup> Therapeutics

TCR<sup>2</sup> Therapeutics Inc. is a clinical-stage immunotherapy company developing a pipeline of novel T cell therapies for patients suffering from solid tumors or hematological malignancies. TCR<sup>2</sup>s proprietary T cell receptor (TCR) Fusion Construct T cells (TRuC <sup>®</sup>-T cells) specifically recognize and kill cancer cells by harnessing signaling from the entire TCR, independent of human leukocyte antigens (HLA). In preclinical studies, TRuC-T cells have demonstrated superior anti-tumor activity compared to chimeric antigen receptor T cells (CAR-T cells), while secreting lower levels of cytokine release. The Company's lead TRuC-T cell product candidate targeting solid tumors, gavo-cel, is currently being studied in a Phase 1/2 clinical trial to treat patients with mesothelin-positive non-small cell lung cancer (NSCLC), ovarian cancer, malignant pleural/peritoneal mesothelioma, and cholangiocarcinoma. The Company's lead TRuC-T cell product candidate targeting hematological malignancies, TC-110, is currently being studied in a Phase 1/2 clinical trial to treat patients with CD19-positive adult acute lymphoblastic leukemia (aALL) and with aggressive or indolent non-Hodgkin lymphoma (NHL). For more information about TCR<sup>2</sup>, please visit www.tcr2.com.
