

## TCR<sup>2</sup> Therapeutics Reports Inducement Grants Under Nasdaq Listing Rule 5635(c)(4)

July 1, 2022

CAMBRIDGE, Mass., July 01, 2022 (GLOBE NEWSWIRE) -- TCR<sup>2</sup> Therapeutics Inc. (Nasdaq: TCRR), a clinical-stage cell therapy company with a pipeline of novel T cell therapies for patients suffering from solid tumors, today announced the Compensation Committee of the Board of Directors of TCR<sup>2</sup> approved the grant of inducement stock options covering an aggregate of 250,000 shares of TCR<sup>2</sup>'s common stock to 1 new executive employee on June 27, 2022 (the "Grant Date") and an aggregate of 64,800 shares of TCR<sup>2</sup>'s common stock to 9 new non-executive employees on June 30, 2022 (the "Grant Date"). The stock options were granted as an inducement material to the employees' acceptance of employment with TCR<sup>2</sup> in accordance with Nasdaq Listing Rule 5635(c)(4).

The stock options have an exercise price per share equal to \$2.89 for executive employees and \$2.90 for non-executive employees, which represents the closing market price on the Nasdaq Stock Market of TCR<sup>2</sup>'s common stock on the Grant Date. The stock options have a ten-year term and will vest over a four-year period, with 25% of the options vesting on the first anniversary of the employees' date of hire, and the remaining 75% of the options vesting in equal monthly installments for three years thereafter, subject to the employees' continued employment with TCR<sup>2</sup> on such vesting dates. The options are subject to the terms and conditions of TCR<sup>2</sup>'s 2022 Inducement Plan and the stock option agreement covering the grant.

### About TCR<sup>2</sup> Therapeutics

TCR<sup>2</sup> Therapeutics Inc. is a clinical-stage cell therapy company developing a pipeline of novel T cell therapies for patients suffering from solid tumors. The company is focused on the discovery and development of product candidates against novel and complex targets utilizing its proprietary T cell receptor (TCR) Fusion Construct T cells (TRuC<sup>®</sup>-T cells). The TRuC platform is designed to specifically recognize and kill cancer cells by harnessing signaling from the entire TCR, independent of human leukocyte antigens (HLA).
